The Causes.

The defeate catted in Greke Cephatalgia, and in Arabike Soda, cometh somtymes of greate multytude of humours conterned, in the head and somtimes of an outward cause as of heare of the some of cold, of deankennes, and of a first pe, which be also deuerse, and sumper, but because the aucthore is so thort in his remedies and I entend to write nothings here, but that that

mall be necessary for the binderstan dyng of hym (I well passe the oner at thys tyme.

AND THE PERSON NAMED IN

1

The Sygnes.

To have his mouth open with reed eyes, that he can nepther swalk low is meate, nor drawe his breth.

MRemedies. Cap.rip.

They have turned cinanch or ft nanche into squinancy, inat che is an illamatio of the throst te whych we call the squinanci, it cometh of synanchen which symple th to choke, for in the dysackether is great danger of chokenge.

Configu.

In the squinaci frast let therbe a be pne cut, after v bse repercussive gar garismes wink a wout evaporating, v the matter may coforth (as teraple) the source of mozel, wherin letyl, roles, Licorife, a a little of cassassificula bath bin, sodde in, after v let the vaynes be cut buder the touge,

Nogges tozd in ocapls if it be blo we into of throte or land in forme of a plaster, doth wonderfull heale it Let the head of a Lylly be staped in leuen and let the topce be temper to in somes milke, whiche beinge sodden and gargarised doth by his owne propertye breake the same.

Item inaples that be great a are found in the trees, made and aplied as a plaster, are about al inedicines that are ordened to breake and ripe

the squinance, this is proupd.

Alope yf it be sodden in vineger platar. and vied as a gargatisme and the swelling in p throte or of the grape in the roufe of the mouth wilbe con sumed. Especially if p slowers there of be made in pouder, a put vinder p swelling with the fynger.

Item ventoles aplyed to the head beynge shauen, drawe the hangyng fleshe away, and so ease that party,

Make pulse of the branne of lyght

lyght wheat somewhat mork wyth Uineger wherin sirst Rue hath bin sodden, then open thi mouth to sup the it restozeth wonderfully p spead the beying low.

Dielco.

The alhes of any servete dereth by a helpeth the dyseas of the mou the and flap if it be swollen.

Let the rote of Saledyne stampte sethe in wyne, wherof a Gargarys sme made healith the swellyng in genouth and purgeth the head.

A plaster made of dogges turde & mans ordure and the gall of a bull

is very good.

Abake a gargariseme with the descotion of dived frages, and dogs ges turde it doth quickely open & a postume.

Thaue harde many expert men say y Terus stampt and layd to whote as a plaster, hath healed oftentimes the squinance.

Dioscorydes sayeth that Uteruen

boude to the swellinges dothe open them, heale them, and sparle them.

The flower of Dre epe contp, Diokor. nually e eaten, never wyll luffer the

squinanci to tyle or growe.

The earth of a Swallowes nest auteen made in a platter taketh awaye the swelling of the Jawes and teares.

The flowies of Pomegranate, & Camphoze made to pouder is a ble Ned medecyne to heale the swelling in the throte.

Gaules with falt Armontake are

good therfore.

Thys hath ben proned, take of the feed of Koles a pound a half, of \$ toyce of goates beard.3 tit. seth the in wone and make a Gargarilme.

Agapult a daungerouse squinkey burne oldeswallowes in a new ears then pot, a mengle the pouder ther? of with hong, and with a quill put te doune into thy throte.

In the daunger herof take aw ap p duold

bloud w bentolis aplyed betweng holders of & paciet, it doth much dympnishe the matter and drawyth it to the contraty part.

Take the fleshe of a fat Catte the Gibert. greace of a Gole, of a graye, and of a for, a the mary of a Hartes home Aup, Sage, Rue, Arzgins ware, Frankensence, the polkes of rollyd egges, Snayles, put them all in an earthen pot that hath a hole made in the botome for the nones, and let it be close aboue with past that no apre map isseme forth at all, and put buder the same pot, another whole pot a close the together and put the nethermost in ground, & as it were burpe it in earthe, and compasse it about wyth fyze aboue, a ther wyll distill a wonderfull good oyntmêt out of the upper moost pot whyche wylbe good for the cold goute.

Agapust the cold and swelling gout Boute, take stale grese, and the white tes of egges, beate them together a good while a mingle together by imstone, the rote of red Dockes quicke siluer without and fier, whe the same plastered whom some lether, early a late, let it be remied, it shall cause it to yiche greatly, but pet doubte not thynge of it, so, it wyl heale thee.

den proued of thys Gylbert a is an wonderfull invencion. Take of the bare earthe of Emetes. ziiti. of bars ly branne. zi. of Role, za a halfe, of bene floure. za a half, malowes wa drage ana. z bi. sethe the mallowes and mandrage in three pound of wa ter but halfe, and make therwyth the other medycines beaten to pour der in a mortare, and myngle there with Mar and yolkes of egges, of Safron. ziit. kneade them all well together, a it shall nede none other plasser or medicine,

In other platter whyche is to be bled when the grefe is mooft behes ment, Take of honi combe. 3 i, and of the mylke of Bacipe Ayepen in Rose water and Rapne water ming lid together, 3 i. and a halfe, mingle the together in a mortare, and blys ende them well with the white of an egge, make a cerupe, and applye it, is very good.

Item sethe spre Backes, oz Rere myly in Rapne water, a afterwarde Arepne it, and put therto of ople of Roses, and bowes of noyllowes, & lethe them buto the consumpeyon of the Dyle, it is much worth both in a hote and cold cause, for it hathe

an buknowen bertue.

Shyp Pytche, and falt Ammos ploseog. ntake myrte together, is a lyngus lar helpe for them whyche have the Crampe,

Item Betony stampte and plas D.iiii. stered

stered byon the grese of the Goute, easeth the same, and the decoctyon therofocing dronke doth the same soner.

Take oyle of Henbane anoynted by on the grefe of the goutetaketh

away the payne.

Item a bathe made of the decocition of flewort taketh awai al gouts

Tyme stampt with the white of an egge and applied for a plaster is a good and helthful medicine for glopnte sycknes, and especyally the sciatica.

Take Bay berys and the leaves of Rue, Tyme, Azgayne, Pennyzis al, old sope, myngle them together and free them and apply them by other hote goute, with towe, the place beinge fyzit anounted w Honge, it taketh away the goute and al other grefes.

Thys is a preciouse oyntment a gaynst algote and toynte sycknes,

take

take the thre fortes of Snaples gaz thered in Mage, and put them in a frying panne, ble it for an opntmet

Thys folowynge is approued re medpe, in all cases, wythout purga cion, anoput the place with & toyce of Galpngale and of artychokes, oz lay a spounge by on the grefe dipte in warme wyne of the decoction of comin, it wold draw out the hurtful humozes, it hath ben proupd. Harés dounge discomperd w war: wee. tne wine, and plastered, heleth btter ly those phaue the sciatica, thoughe

they be past hope. Anophtment made of hartes horne

is good for the same disease also.

This is a most assured opnimente Bubert agapust at old goutes and soputes sicknes agaynst the palspe. Take For flesh and sethe it in good wrne tyll it faule from the bones, afters ward stampe the stelle myghtplpe, beinge bote and wayinge out & topce ther

therof and lethe the lame lopce tyll it be as thicke as an ointment, after warde put a lytle red war therbuto and litle of pouder of Malticke of Castozeum boelit, myzre Bayberis a quantitie of eufozbium and a litle of muske, and let them be incozpozatyd all together as anoputment.

Another most certapne approupd oyntment. Take abygge toote of Bzponpe, a make it hollowand put into the holownes therof vioyce of Belleboz, Calamint. Tyme, oz Bue, unto two hollow partes and let the thyzde patte remapne emptye, and put the pouders therin mencponed. in the formare opntment. Pyzetory the roote of Gétian, and hermodace tiles, and put therto Petroleum oz fume olde ople and udare, and let it be stopped with Potters clape oz paste, and let it be put in the embres there let it bople a good whyle and afters afterwarde stampe it, and wayinge out the toyce, vie it for anountmen.

Another opntment of efficacye, therbuto, take the topce of a wylde Cucummer rote, grene Grapes, partitozye, the leaves and beryes of Intozec, the leaves and beryes of Intozec, the fat of a Gripe, of a Gole, of a Peron. of a For, and of a berethen take a fat Cat and pull of the skynne, and fyll hyz wyth all these foxlayd thinges, and let it rost well by on a spit agaynst the tyze, and let the dzippyng that cometh of her be kepte and resolve a sytle war ther in, and annoynte the grese there, wyth.

Item kyl a whelpe of.rrr.dapes olde and anoput the papueful grefe, with the bloud of the layd noelpe,

tt is very good.

Item sethe the stelle of the sayd whelpe in wone, woth Rue Becaup

Kenigreke, Egrymony and Sage, afterward stampe them al together and put to a litle mary of a Hartes bone, a feweathes sethe it in masner of anoyntment, and anoynte the place, it is very good.

In a great and extreme payne of the toynt sycknes, take a whelpe of the age foresayd and rost hym, and cut him in the middes alongyst the backe, and applye it hote, it is very

good, and much worthe.

Item leth Rue and Sage, in oyle together and beinge hote stamped, apply it to the greee, it wyl alay the

payne incontinet.

Conft.

Constan.

Bople the topce of Penbane in Pareace of hogge, and put ther but a litle wax and anoint the grefe ther with: herbe it lest also soo in wine and bound but the grefe appealth thinmediatly.

A plaster made of the rote of wals wort and Permodactiles, stampte wyth with Hogges grese, and boud bis to the cold goute, helpeth the same.

A plaster made of Ore, and Hogo ges dounge sodden in beniger, and Rauens grese, cattes grese, or Heartons grese, is very good against an immoderate payn. Adake to pouder 3 t. of Opiu minglid with Sastro and yolkes of Egges, and ovle of Rosys, thys myghtylye assugithe and restraneth the matter,

Item take Emetes and the egges of them, and a litle of pearth where in they dyd abide and comon salte, mengle them with egrese of an olde Hogge, and beinge put betwyne a clothe of lynnen applye it buto the

grefe.

Afisselto boylid in water and the grefe beinge bathid wyth the sayde water hath great helpe therby.

Item ashes of burnt Trine myn gled withe whyte of an egge a place devid byon the place, brektth gout

> GRemedies. Cap.rliii.

Hele Remedies folowing at agapust the frenche Pokes Lepzy and such lyke.

Afake anountment against the Scabbe that is ingendered of falce flegme, of Aloes and buquenchyd

leme with comon oyle.

Byofcot.

Frenche garlicke freed wyth ople killeth the il scabbe and the brekig out therof applied bpo the apole teim

teni, to bit touche no other fleshe by a it brekith the same Immedyatly.

To heale an old Lepzye. Take a sulces. setpent of a depetyll, and cut of the head theroEquickly, and the tayle, & let hyz blede a Aureabout the blod tyl the bleding ceale, and afterward let the Setpent be mundified from his inwardes, and let it be sodden a cause the pacient to eate therof eues ty day. 3 i. A drynke the wone where in the serpent hath ben sodden, tyli the lepzouse person beswollen and puffed up and begynne throughe Anguphe to be in a manner belyde hym selfe then put the pacpent in as stewe or hote house, and let the hole body of the pacient be anounted us the liquor wherin the adder or fers pent was sodden, for the hole fleshe and skynne is therby renuid and so Wal the paspene be persytly healto. Take a blacke serpent the head bes ingecut of, bury her, til she be tul of Miii. Dudunes

wormes a then let hyr be dryed, and give therof unto the leprouse, i, with a syrope of hony every day.

tion offerpentes, and fede hens we the same come, and let them dynke is same water, and ther fethers shall fall of, and when they be unfethered let them be sod, and let the lepsouse person eate them, and drinke the water wherin thei were sodden, and let therwith.

This same experiment is sagde to beate the pockes for a certayntye in one day, take of mollen, pytche. Itil of quicke brimstone of salte Peter: Frakencese ana. Itias muche ople as shalve thought sufficient, make it and worke it by well, a reserve it

as pe that ocupy it,

Circan.

The barke of our ladys Thystell stampt with byneger and applyed, taketh biterly awaye all scabbynes

and

and scueffe!

Take neling pouder, louage, fend nyll, and feeth them all together in wyne, washe the pacient that hath a deformptie of the skynne enclyning to a tepry, and it wyll cleare hym.

A precyous oyntment against the scabbe, which is wounderfull, in effecte and hath ben oft prouyd,

Take of quycke sylver zii.ofeus phozbium. fi.of stautlagre. fit. of litarge. 3 iti. of luet a pound a halfe make an opntement a let & paciente be anounted ther with, al the armes Mulders, and back bone, and about the knees, eyther against the son of agapult the fier, and if you perceue by anounting the pacient with this buctyon, that he be inclyned to bos entting, or els any swellpage of the bpper partes in the bodye, anopnte hym no moze yf not, cease not to an oynt hym til y seueth day be patt, & tsthë he breke not out, make a some W.tit. tacton

tacion agaynste the Komake with water of the decoction of Rosemary and Sage, and after thre dayes let make a bathe with water of the decoction of enulacapana and docke and lay a whyte lynnen cloth by on the anounted place, that the oyntes ment touche not the other partes of the body by this maner of ordering have many Lepzouse persons bene health.

Agaynst the Frenche Pokes take of brimstone. zit. of nelynge pouder quicke sylver, & Cumin, Ana. zi. of Staphilagre. zi. kahalf. and incorporate the wi. zwi. of stale hogges grease, by thys meanes every eugli disease or sycknes is for a surety he led, except it be full of giandules or kernels which must be cured after

other meane.

Reape a cocke fastyng thre dayes and then the hym to a stake with some Cords, and the a tode by hym with

with a corde also, so that the cocke may eate hym, within two dayes at ter the eatynge of the Tode, kill the Cocke, and sethe hym in pure good whise a good while, put rawe hony therin, let the pacpet vse the same entry daye, a henne were better. But thus hath it ben proupd.

The leaves of Lilly stampte and placerid bpó y grefes, healeth the, Titriolum citrine diped a myrt wo bineger, a burned bpó a tile charde and do so by it thinge, last elye make it to pouder beinge applyed, it hear

lith the speknes.

The rotes of Lekes, made in a place the and applyed by on the glaudustes or kernels (wherof the syknes connects) healeth it and anoput the blacets with this opniment.

Take the topce of leke blades, ople and ware and incorporatethe, and so anount the places y be cancrobs to healeth them wounderfullly.

M.iiii.

Melte

Melt talowe and dyppe therin a tinen clothe, and so bind it to the legges, it doth excedyngly well heale pultules of the legges a els where. Take the pythe of leauened breade stampe it and tempre it with wine and honge, a make them bogle toges ther a myngle therto talow a spred it byon a lynen clothe, and apply it hote to p brugles a greuous pustules of the legges,

The cuttynge of the vayne that is nyghe the bygger toynte dothe myghtylve heale the scabbe and the

eupli pustules on that spde.

Molcos.

Dipe figges stampte with f flou tes of Juy, a so applyed do mighty lye helpe the paynfull pustules of

the legges,

Stampe red myntes, Rue, blacke bery oz bzamble leaues, and mozell together with the rotes of lilly mirt them with the whytes of egges, bis neger a oyle, strayne them all toges ther ther and anopate the therwyth, it is

wounderfull good.

Sethe the rotes of docke, and fape profess. them mightely with hogges gresex put therto quycke spluer quenchpo wyth Sage and ashes, incorropora te it a anounte the ther wyth, it wyll pelde wounderfull effecte.

Seth the floures of Mertworte, mightily in vineger, a put ople ther to, anount the therwith, it wyl heale the lepzy, the scab, and al itchynges

Apply to the vicers beinge frist mundyfred tryacle and in y spring folowyng, oz thë (yfit be thë spzig)

thou thalbe hole.

Take staphisagrez litarge make a pouder and a bathe, and after wa the thi self it is good agayust & moz feme.

The smoke of henbane sede (& gree ned member beeng fumigatio there myth) healeth.

Anountment therwith expert and connynge

Eunaying men lay that thoughe the paulmes of the handes and fooles of the feete) being nothrng greupd) be anounted ther with pet al scabbys nes is také cleane away from al the body. Take of ople of bayes. 3 iiii. of whyte frankenceule, and cleare whytendare. Itt. of quicke spluer. quenchyd wythspettell.3 t.of Hog ges fat well fryed, 3 v. of vape salte well stampte. I vin. of the topce of plantayne, and fumptozy as muche as you will, nigngle them all toges ther, and pf your confection be suft and good, it is a wounderfull expe timent.

Sky36k

Take a snake and roste hy; wyth saite, and afterwarde butne hy; in a potte well closed but o pouder, and gene the same agaynst all Lepip: & al other despetate greses.

CDf Blandules of cuencie.

These symes and tokens do declare whe any kind of disease is aboute to infecte the head, da selving in the eyes, the headache, heuynesse of browes, a noyle in the eares, paychinge in the temples, the eyes to water in the morning and the syght to sayle, w dulnesse or want of smels

lyng and the lyftyng bp of the gunnnes.

When thou doest percepue any suche tokens it is the bear remedy to purge & clense the head (and that wyth no purgatque medycyne) but with fine vaces of wine made of witherin ara pes, 03 of new wine foode tol half be wasted as way therwith thou halt wathe thy mouth fas Aprige, and gargaryfe it therin tol the head he purged of flegme therin contyned, and thys is the easpest remedy for al dyseasys in the head. Alfo it were very good and helthful, yf the va epent faftyng woldeate a quatitie of mustard whych have ben macerate or feped in water and honp myngled togyther, & gagarifyng the same wold drawe downe the humoze conteys ned in the head, but frast of al you mooste take hede the heade be coacred trillit heat, whereby the flymp flegme map be made moze aut ameta to flowe downe to the mouth.

Pow of the contrary part, whoso despisely these sygnes and tokens that troubled with these deseates, or one of them, the ophialmy, perie in the eyes, breking out about the eares poukes or weles in the necke, the consumption in the happer, heuinessein the head, the squinas

g.iii.

cye, wormes whiche eate the heare, the paynes in the flave that concreth the wynde pype, the failing of the heare, feables or vicers in the

61

head, and the toth ache.

You may epercepus by these tokens y fany man is lyke to be deseated about the bleak of no, sylk a swette through all the body i break the tonge to ware roughe of these, the spyttes to be salt, or by there in tast of choicehe, soderne paynes in the sydes of shulders wythout manipself occasion, of training muche watchyng, suffect the occasion, of training muche watchyng, suffect poness, thurse after sleape, greate sade nesse colonesse in the break and a shakinge in the arms and handes, and the diseases there of ensuring you may auogde with parbrekyng after a meane supper, wythout recepting any medecyne. Ilso it is pery good to bomyt sar struge

Therforelet him that wold vomit eate Ras dythe. Commerces, Roket Abustard, or, pur sane, and afterwarde drynke warme water the shal vompt furthwyth, but he that settethe speels by these presagres and sygnes oughte to feare these dyseases, the pleurist, paynes in the longes, melancholical madnesse, than eagues, the phrensye, the sethargy, and a burnynge as

gue wyth pelkynge.

When the belly chalbe dylealed, sume of the tygics do comenly appeare before, the thros wes and paynes in the bely, meates and dryns hes to seme bytter, heuinesse in the knees, colde stifnesse in the toynes, werynesse of all the bos dre without any occasion, lacke of sences in the leages and easy seners, Nowe when any of these tokens do appear it is best to make y belly softe any lose with some kinds of dyette

and to no purgig meblepne, for it le legfe lese pardye to ble fuch thruges that a man mare Thant erre in, as betes fodde ib water & hour. foode, garlike, malowes, dockes, or mercurpe and fwete metes made with hony, for all thefe thynges do mollifpe the bely, but if any of the forefande francs bemanifeft or endure longe adde to the larde decoctypons the lorge of bal tard Daffron, for therby it walbe fwetter and more hollome. Alfe Colewortes fod in a great quantitie of water, or four ounces of the loyce therofrecepued wyth honne and faite, is berp and, and of no lelle effect, is the water of the Decoctpon of Erchepealen og bytterfetch biok faffpnge, But they whiche thinke thefe fpgnes to be of none effecte, are oftentymes byfcafes The thefe fycheneffes, the flux in the belp, papnes in p bowelles, the lyentert, ilies paffio whythe is a dyleale in the imale guttes, the ciatica, P feuer tertpan, p goute in the frete, p apoplerre the hemogrhopdes, and the toynte fpekneffe.

5

1

1

MI opseases of the bladder, be knowe bi these tokens, to be very full after lytle meate, greate inflatyons, much beichynge the pale colour of al the body, heavy or fad fleave, bypne wane of coloure, and great paynes in the making thers of, with swellinge aboute the preup membres, after which tokens it is good to ble odorptes rouse thringes which moue vipue as the rotes of finel orverfely, whychehaue bene fteped & whyle in good todopiferous whyte wyne of p whych let the pacpent take euery mogninge fa Ayag thre vnces in the water of relowe carets tes or louage of enulacampana, for they be of lyke operacion, tof no leffe effecacy is the was ter wherin Chiches haue ben fteped in, if it be dronke wyth wyne, But whoso doth lyghtlye passouer these tokes thall loke for some of thes Tollit.

dyfeafes, the hydroply, p bygneste of the folene papies in the lyger, the ftone, papies in the raynes, the frangurye, and the diffention of the bely. And here it is to be noted that in all thelespanes befoze rehersed, we ought to minis Ret gentle and eafy medecines to children, and to fuch as be elder, medeernes that be of moze ftronge operation and greater efficacre.

100

Row I entende breffy to declare buto pour matelye the two turnynges of the fone called in latyn folktitla (at whych tymes such thyns ges do comenti chance) and what meates your grace thal vie oz absterne from, in epther of the sakpage my begrunyage at the wynter turs

nynge.

Bolkitic. kiemale wich I cal D wynter turne, is as cember when the Con entreth the Goate.

The fortg equinocial is p.r. day of Marche whe p son entreth the Mame.

The wenter turne.

I ft the wenter turne do rewmes and humi .. ditte encreafe in menes bodps tpl the fpilg equinoctiall, therfoze it is good to eate whote meates and to dynke fwete wynes and efpes bout the.re egally wyth wyld margeram, and also to vie p day of Des company of women.

Therbe from the wynter turnynge to the

spryng equinoctiall nynty dayes.

The spryng tyme equinoctiall. From the tpaying equinoctiall buto therys lynge of the seuen steres called virgiliae, dothe Regme and swete corruptyon of the bloude en gendzein mans body, and foz that caufeit is good to ble morst and tarte meates, to excerct le p body, s not to absterne from women, from the springe equinoctial to the rylinge of pleia des bertlet. daves.

the tylpinge of the leuen Aterres.

Choler and bytter matter berythe rule in The fenen man from thys tyme buto the fomer tuenyng, therfoze ble meates that be fwete, laratiue, be virgilia og ware of actes venereal, fro the rilinge of pleia pleiadfrile des buto the somer turne be. rlb. daves.

The sommer turnpnge.

At thes tome to melancholpe angmented epil the herueit equinoctiall, therfoze dipneke cold water and fmell odoziferoufe thynges, as for venus you moft epther ble it moderatip or erchem it beterig, we have to the herneft es quinoctiall upnty and thre dayes.

The betuest equinoctiall.

Tflegmes theme Auryons abounde fro thes eyme to the settyng of p squen sterres, therfore ttis good to purge phumoures of to ftoppe p flurpons, and to cate al tarte and mort mea: tes, to perbrake nothynge at all, to excercyfe & body, and to flee women, from why the tyme to the fettping of the feuen flerres. be errbi. days

The settying of the seuen Sterres,

From thys tyme to the wynter turnynge both flegme bere dompnyon in man, therfoze Che seupn you most eate fat & bytter thynges, diinke fwete wynes, and excerepfe the body, from the going bowne of the. bil. Gerres tyll the Wenter turns befrue and fourty

fters called to the fone aboue b. ig day of man

The Comee turne is as bout.r.of July, when the some em treth the Crabbe.

The hers neft equis noctiall fa about \$ 14 of Deutes ! bre whe p fon entreth the balace.
